

**LAKESIDE MUNICIPAL UTILITY DISTRICT NO. 3:
NOTICE REGARDING WATER RATE INCREASE**

As many of you know, the MUD receives wholesale water service from Manville Water Supply Corporation. The cost of that wholesale water service has increased from \$3.50 per 1,000 gallons to \$4.00 per 1,000 gallons, effective as of April 1, 2023. As a result of this increase, the MUD's board of directors has adopted a corresponding \$0.50 increase to the volumetric component of the retail rate that is paid by its residents. The current retail water rate charged by the MUD to its residents is comprised of a \$16.00 per month base charge, plus the following volumetric charges: \$4.65 per 1,000 gallons (0 – 7,000 gallons); \$4.85 per 1,000 gallons (7,001 – 14,999 gallons); and \$5.55 per 1,000 gallons (15,000+ gallons). The new retail water rate will be reflected on the utility invoices that MUD residents receive this month.

Should you have any questions regarding this water rate increase, or any other MUD related matters, please direct those questions to the board at an upcoming meeting. The MUD board generally conducts its regular meetings at 6:00 p.m. on the second Wednesday of each month in the Commons Amenity Center located at 20601 Commons Parkway.
